CERTIFICATION SCHEME FOR OCCUPATIONAL HEALTH & SAFETY PROFESSIONAL

Certification scheme for persons – Requirements

ISO/IEC 17024 is unique amongst the CASCO standards in that it contains not only requirements for the certification body but also requirements for the certification scheme. The certification scheme requirements are contained in Clause 8 of ISO/IEC 17024 and these requirements must be met in order to conform to ISO/IEC 17024. The following sections address each requirement of Clause 8 (Scheme requirements) and provides information on the intent of each requirement. The purpose is to assist scheme developers to meet Clause 8 of ISO/IEC 17024. For convenience, the wording of each clause has been highlighted in blue.

3. Required competence for OHSP: Workplace Inspections: Safety officers inspect interior and exterior work areas to determine if there are any safety hazards. During these inspections, a safety officer looks for broken equipment and damaged equipment, slip-and-fall hazards and other potential hazards. The officer also observes workers to ensure that they are wearing required personal protective equipment and following company safety policies. In the construction industry, safety officers check the stability of scaffolding, ensure that workers use hard hats and protective footwear, and check to make sure employees operate construction equipment in a safe manner.

Accident Investigations: When a workplace accident occurs, a safety officer conducts an investigation to determine why the accident happened. The officer may question witnesses, inspect the accident scene and take pictures of any property damage. Once the officer determines the cause of the accident, he writes a report detailing the cause and provides recommendations that can help prevent future accidents.

Training and Coaching: Requires to provide training on different safety topics. These include fire prevention plans, hazardous materials handling and machine guarding. Construction safety, Safety Induction training needs, develop appropriate training programs and deliver training to employees. They may also solicit feedback from workers and use that feedback to improve existing programs or create new ones.

Regulatory Compliance: Employers must comply with safety regulations set by local authorities and state occupational safety agencies, labour laws. This involves reviewing standards, implementing plans to meet those standards and following all record-keeping requirements. Safety officers complete the injury logs as required, which is a summary of all injuries that resulted in lost work time, restricted duty or job transfer. They also ensure that the poster entitled "Job Safety and Health: It's the Law" is displayed in a conspicuous place in the workplace.

- 3. Abilities (when applicable):** As such there is no specific requirements in terms of abilities however it is recommended that person should be physically and mentally fit to perform the OHSP task in any organization.
- 4. Prerequisite (when applicable):** It is recommended that a person/candidate planning to undergo OHSP certification should take a formal training in one of the Occupational Health and Safety domain before appearing for OHSP certification, the best way to prepare for OHSP exam is to take a training seminar or study on your own.
- 5. Code of Conduct:** All persons Certified as OHSP by PECB recognize that such certification is a privilege that must be both earned and maintained. In support of this principle, all PECB members are required to commit to fully support this Code of Ethics.

	HEALTH & SAFETY PROFESSIONAL	

PECB members who intentionally or knowingly violate any provision of the code will be subject to action by annual review panel, which may result in the revocation of certification.

There are three mandatory canons in the Code:

1. Safety of society, welfare, the common good, necessary trust and
2. Act safely, responsibly, honorably, honestly, justly, and legally.
3. Advance by mean of re-certification.

8.3 Certification

Criteria for certification:

In addition to the academic requirement, candidates planning to undergo OHSP certification should have professional safety knowledge, OHS (occupational health and safety) is be the primary function of OHSP professional.

(a) Criteria for initial certification and recertification

- **Criteria for initial certification is based on following consideration**

- Academic qualification of person is expected to be minimum SSC (10th) Standard
- Person should have fairly good written and communication English
- Person should undergo professional Health & Safety training course, the best way to prepare for OHSP exam is to take a training seminar or study on your own.

- **Criteria for re-certification is based on following consideration**

Criteria for the re-certification is based on the changes in the scope of ISO 18001 which will have direct impact of OCCUPATIONAL HEALTH & SAFETY PROFESSIONAL (OHSP) certification. Re-certification cycle is set to be 5 year. Criteria for re-certification is set based on reviews conducted related to the OHSAS 18001 certification scheme.

(b) Assessment methods for initial certification and recertification

The assessment methods selected for initial certification is dependent on the scheme competence requirements. PECB Assessment methods include both written and practical examinations.

2. **Setting of examination paper:** A Set of the Questions is prepared by the Operation team with proper involvement of Subject matter experts. Out of those Question papers, questions are set by the Operation team. Examination mode is defined hard copy only.
Examination is set of the 100 marks paper 1, 100 marks paper 2. 100 Marks project practical.

	HEALTH & SAFETY PROFESSIONAL	

3. **Batch making for Examination:** PECB will make batches of 5 candidates to conduct the examination. Maximum candidates can be 30 per batch.
4. **Conducting of Assessment:** Assessment will be conducted by the PECB as per the requirements. Approved examiner by PECB will conduct the examination. During the Examination, examiner will follow the impartiality, confidentiality, security & conflict of interest as per the MOU signed with the PECB as per the requirements of ISO 17024:2012 requirements. Examiner will submit the Examination paper to the PECB within 5 working days after the assessment.
5. **Marking of Examination papers:** Examiner will mark the examination papers within 10 working days after the day of examination and papers received from Examiner.
6. **Passing Criteria:** In paper 1 and paper 2 (theory papers) candidate must achieve 45%, in paper 3 candidate must achieve 60% (project). To Qualify in Overall examination, candidate shall pass all three exams.
7. **Failing Criteria:** The Score less than 45 (<45%) in theory and 60 (<60%) is considered as referred in examination which mean student can re appear for exam,. The candidate passed in one section will be considered as fail in overall examination, Candidate must clear all three papers to be Certified and Certificate Award.
8. **Grace Marking:** If in any section, candidates obtains marks between 43-45 & in other section (/practical) gets marks 58 or more then grace marking will be given to the candidate.
9. **Final Decision:** After final marking of examiner, final marking summery is submitted to the Director. Director reviews the summery sheet & if requires asks for any examination paper for moderation.
10. **Award of Certificate:** Certificate will be issued to the Qualified Candidates with 30 working days after the final decision.

Same process is being followed for re-certification except point 3 mentioned above.

(c) Surveillance methods and criteria

(d) Criteria for suspending and withdrawing certification

- Suspending the certification

The major causes requiring a suspension of certification are as follow:

- The candidate has persistently or seriously failed to meet the certification requirements.
- The candidate does not follow re-certification cycle.
- The candidate does not follow Code of Conduct
- If the candidate is found to misuse the logo of the Certification Body or is using any kind misleading statement which might affect the reputation of the certification body.
- In case of Nonpayment of the fee as per the Contractual agreement.

Upon the Suspension the certificate will be surrendered from the candidate, the PECB web site will be updated that the candidate's certificate is suspended (not valid). After withdrawal of the certificate if the candidate is found using the certificate or certification information in any manner, legal action will be taken against the candidate as per the contractual agreement.

- Withdrawing the certification

Withdrawal of the certificate shall be initiated if: The candidate does not meet the conditions of suspension.

- A suspension is not considered to be an adequate action
- The decision to withdraw a certificate shall be formally communicated to the candidate including the requirements to:
- Terminate use of the certification mark and any reference to certification
- Return certificate(s) and copies to PECB.

Withdrawn certificate will be collected and destroyed as per the procedure established in for control of records i.e. by burning. To avoid the misuse of the certificate.

The PECB shall have enforceable arrangements with the certified candidates concerning conditions

of withdrawal, ensuring upon notice of withdrawal of certification that the

candidate discontinues its use of all advertising matter that contains any reference to a certified status

- Continued misuse of Accreditation mark/logo e.g. misleading publications, advertisement or contravention of the stipulated conditions for the use of marks/logo. Upon suspension

	HEALTH & SAFETY PROFESSIONAL	

or cancellation of certificate of registration, the name of the candidate shall be deleted from the PECB's approved list of certified candidates.

- Upon request by party, the certification body shall correctly state the status of certification of a candidate as being suspended, withdrawal or reduced.

(e) Criteria for changing the scope or level of certification (if applicable)

N/A

8.4 The involvement of appropriate experts

(a) The involvement of appropriate experts: PECB has ensured the effective involvement of the experts related to the OCCUPATIONAL HEALTH & SAFETY industry experts while designing the certification scheme on OHSP, these are full time expert resources works with PECB, detailed list of experts is provided in the document section separately.

(b) The use of an appropriate structure that fairly represents the interests of all parties significantly concerned, without any interest predominating : PECB uses an appropriate structure that fairly represents the interests of all parties significantly concerned, without any interest predominating PECB maintain clear set of documents of management review records, minutes of the meeting records, feedback forms and other supporting documents as required throughout the life cycle of the Certification scheme, PECB technical Committee (SMEs) who develop scheme are being maintained by operations team who regularly update the technical qualification and records of the appropriate experts (SMEs) who are being involved in scheme development.

(c) The identification and alignment of prerequisites, if applicable, with the competence requirement

The requirement set forth as pre-requisite is mainly the academic (SSC) and communication English, apart from professional training in one of the domain of Occupational Health & Safety. The proof of above documents will be the application criteria for enrolling into OHSP certification.

(d) The identification and alignment of the assessment mechanisms with the competence requirements

There is no need of separate assessment mechanism needed as such, assessment mechanism will remain same as initial certification mechanism as indicated in above section 8.3.3.

8.5 The certification body shall ensure that the certification scheme is reviewed and validated on an on-going, systematic basis.

PECB has mechanism in place to review and validate the occupational health and safety professional scheme in ongoing basis, The validation and review of OHSP certification shcheme is linked to OHSAS 18001 revision process after every five years with
